COMPANY / CAPABILITY STATEMENT

RiGi Group, LLC

AI decision governance and assured autonomy, from strategy to fielded workflow. Creator of WhiteWater.ai and WWAIOS™.

Core competencies

- AI decision governance and assured autonomy (WWAIOS™)
- Decision gates, authority boundaries and tamper-evident decision records for AI agents
- Test and evaluation design for autonomous and agentic AI
- Forward-deployed AI engineering: architecture, data and API integration, delivery
- Fractional Chief AI Officer leadership for multi-company portfolios
- AI and cloud delivery: Epic EMR, Amazon Connect AI, data integration and automation

Differentiators

- Defense engineering pedigree: founder served as Senior Research Engineer in the Attack Aircraft and Missile department at McDonnell Douglas and Boeing
- Proprietary IP: WWAIOS™ (U.S. trademark application, Class 42), the Context-Verified Decision Contracts reference implementation, and U.S. patent publication US20120284051
- Model-agnostic and deployable on premises
- Evidence-bounded claims: nothing is called ready without a receipt someone else can check

Past performance

- Chief AI Officer for a $200M+ holding-company portfolio of seven businesses: AI strategy, architecture, delivery and IP commercialization, including a 10-week executive AI program for each company
- Restaurant voice AI: integration and pilot readiness across POS, databases, APIs, mobile, loyalty, kiosks and back-office systems
